My Messages

Notifications are messages that are sent and received within the RLP platform. These messages are used to communicate with users and keep them informed about various events, updates, new assignments, or interactions within the platform.

My messages: In this section, the Student can access all the messages they have received on the platform. Furthermore, in this option, new messages can be created and sent.

- **Delete:** In this option, you can delete received messages by selecting the message and clicking on **Delete Selection**. This action must be confirmed as it cannot be reversed.

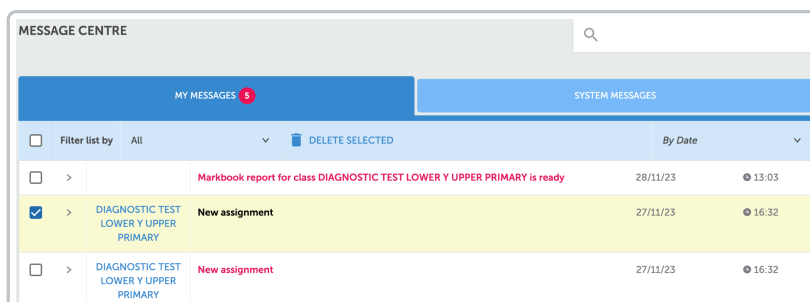

The **My Messages** option on the platform provides the student with a set of tools to manage communication within the platform.

The platform allows for the deletion of received messages following these steps:

- **Message Selection:** The user can select one or multiple messages they want to delete. This can be done in the sections for received, sent, or system messages.
- **Option Delete Selected:** After selecting the messages, click on the Delete Selected option. This action will permanently delete the selected messages.

The platform displays a warning that this action cannot be undone. This ensures that the user is aware of the permanent deletion of the messages.

If you have any additional questions, please refer to the Frequently Asked Questions section: [Click on here](#)
