How can I use the filter option?

The use of filters provides you with the ability to organize, explore, and analyze your items in a more effective and precise manner. These options are designed to enhance your experience when interacting with available content, simplifying the search and selection of the information you need.

You can use the filter by selecting the desired option:

- **By Class:** This filter allows you to group items according to the class they belong to.
- **By Document Type:** By selecting this option, you can sort and examine items based on the type of document they correspond to.

You have the option to view documents based on the following criteria:

- **By Title:** This option allows you to find a specific document if you know its title or part of it. Organizing documents this way makes it easier to identify and access the information you're looking for.
- **By Upload Date:** This option is useful for tracking recently added documents or locating documents that belong to a specific timeframe.
- **By Size:** This option enables you to sort documents based on their storage size. This is valuable when you want to identify small or large documents.
