Query example - iREAD

The query can be performed with each combination shown below:

Example:

- Query active users who have read a specific genre.
- Query users who opened a book without reading it from a specific sector.

The goal is to obtain a more detailed query about the readings.

The statistics provided by the iRead option are:

View users:

- **Subscribed:** This option displays, by country, the total number of subscribed users and schools, as well as the level at which the users are located. By click on *Schools*, it provides the detailed information about schools and the total number of users for each one.

Subscribed Users

[no country]
